

# RAPID ASSESSMENT AND RECOVERY OF TROUBLED PROJECT

Effective Project Execution and Mitigation for Assurance of Deliverables

## PROGRAM HIGHLIGHT

This program assumes that participants have certain amount of experience in running a project. This program provides necessary skills to rapidly assess project failure, its impact on original and recovery feasibility. Participants shall be trained on rapid recovery and problem solving methodology and re-start the project with special care on project performance monitoring and through the support and oversight of project management committee.

## Who Should Attend This Training?

Personnel who intend to assume the responsibility of managing project. This should also include personnel responsible in managing ISO based Project Management Systems, to fulfill the requirement of Product Quality Planning (PQP). Positions may include managers, engineers, executives, supervisors, leaders, technicians, etc. Participants are expected to have certain amount of familiarity with project management principles.

## OBJECTIVES

- To provide concepts of Project Risk and Failure Rapid Assessment
- To provide concepts of Project Failure Rapid Problem Solving
- To provide concepts of Project Management Re-Planning & Execution
- Expected outcomes - Participants will be able to assess project with problem rapidly and solve the relevant problem with confidence.

## OUTLINE

- Module 1: Review of Project Management Principles
- Module 2: Definition of Trouble Project
- Module 3: Rapid Assessment of Trouble Project
- Module 4: Determination of Project Failure Impact on Original Feasibility
- Module 5: Re-assessment of Feasibility on Trouble Project Recovery
- Module 6: Recovery Project Management Oversight Committee
- Module 7: Recovery Project Execution Committee
- Module 8: Recovery Processes and Planning, Executing, Control and Closing

## PROGRAM OVERVIEW

Regardless of how good project planning and execution management are done, sometimes failure is unavoidable. Factors of failure may include external and internal uncontrollable uncertainties, political decision, change of policy, etc. Rapid assessment of project failure prevents adverse impact and potential loss to stakeholders. In addition, a rapid business recovery eliminates potential huge lost of time, which could increase project cost exponentially.
